### ICT Tools for Teaching Learning Process: Academic Year: 2024-25

#### ICT ENABLED TOOLS FOR EFFECTIVE TEACHING LEARNING PROCESS

Following tools are used in the Teaching learning process in Online- Offline mode of instruction. During lockdown these ICT tools proved to be a boon for making the teaching learning process easy and accessible to all students.

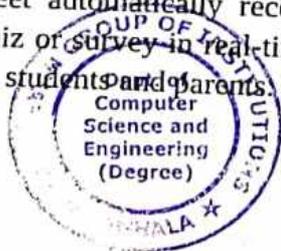

##### 1. Google Classroom - Blended Learning Platform:

Google Classroom is a free, blended learning platform that offers a variety of benefits for both students and teachers. Google Classroom enhances the productivity and take workflow management to the next level. It keeps track of assignments coming in with a simple glance making it very easy to know everyone's status and to follow up with students who are missing work. Everything is time stamped, so late work is easily identifiable. Since Google apps are cloud based the work in Google Classroom saves automatically and is accessible from any device. With the app, both students and teachers can enjoy the full functionality of Google Classroom on a mobile device. Students receive notifications on their phone when assignments and announcements are posted, making it easy for students to stay on top of classroom happenings. As a teacher, the app enables you to post from your phone either right from the app or using share-sheet support.

**2. Padlet Page:** Padlet is a digital education communication platform that makes interacting fun and engaging for classes. Padlet is a digital communications platform that helps makes interactions between student and teacher far more engaging and fun.

From words and images to videos and links, this digital space can be filled and accessed easily from multiple devices, making it superior to its real-world notice board equivalent.

**2. Google Forms:** Google Forms allows to conduct **MCQ quizzes online**. The information is stored as a spreadsheet automatically record the answers. The spreadsheet then populates the responses from the quiz or survey in real-time. Google forms can be used to give feedback to and receive feedback from students and parents.

**3. Videoconferencing Platforms:** During COVID pandemic when the world shifted to Online mode for teaching learning various free videoconferencing platforms like Google meet, Zoom and Cisco webex were used to conduct online classes.

All these have varying needs and features. Zoom allows the facility of using its features using a browser also without the need to download the application, the app download is mandatory in case of the other two software. Zoom allows face touch up facility as well which is not present in the other two competing software. Google Meet allows the maximum on-screen chatting time with respect to the others. It has over 60 minute long conferences whereas the time cap of others is only 40 minutes. Zoom has the highest, that is, 49 people that can be viewed on the screen at once.

**4. Educational Videos and animations (Youtube and Internet):** Various valuable educational videos of pharmacy subjects available on internet, youtube provide additional help in better understanding of subject knowledge.

**5. Smart Classroom:** Classroom integrated with Smartboards and internet connections provides enhanced and interactive learning and teaching opportunities for students and teachers. The internet-connected to systems in smart classes is stored with abundant information. It is accessible anytime for their teaching and learning process. Teachers can access information from various educational sources for teaching purposes. It helps in easy access to online resources. Smart Classrooms helps in developing critical thinking and problem-solving skills in students.

**6. e-Resources:** e- journals from Proquest Pharma and DELNET were available for students to access remotely in online mode and enhance their learning experience. e books were uploaded on Google Classroom.

**7. LCD Projectors:** The days with the use of blackboards filled with diagrams, equations, notes are gone away. The LCD Projectors have become a vital essence in the modern teaching system. They act as a visual aid to the students and teachers. They help the students to learn accurate structure through images. They also support the teachers' explanations with visual accuracy. This tool is used to display video lectures, to present the slides, to conduct quiz, webinars, or any other demonstrations.

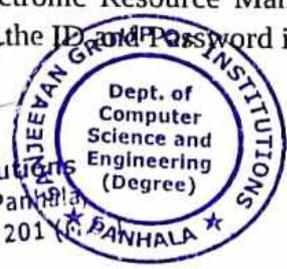

### Outcome

The use of LCD projectors in smart classrooms reflects many outcomes which are listed below.

- The students are able to gain a better experience through new way of learning by retaining their concentration during the whole class.
- Visualization of the contents enhanced the objective of the curriculum.
- The students are able to repeat the text content more precisely.
- Effective usage of class timings.

**8. Delnet :**Electronic Resource Management package for e-journals –Delnet(Accessible from all desktops using the ID and Password issued from the Library)

ICT Tools for Teaching Learning Process: Academic Year: 2024-25

ICT ENABLED TOOLS FOR EFFECTIVE TEACHING LEARNING PROCESS

Following tools are used in the Teaching learning process in Online- Offline mode of instruction. During lockdown these ICT tools proved to be a boon for making the teaching learning process easy and accessible to all students.

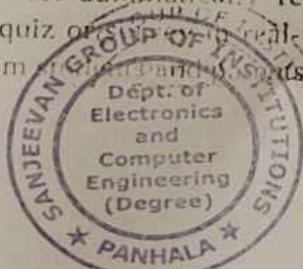

1. Google Classroom - Blended Learning Platform:

Google Classroom is a free, blended learning platform that offers a variety of benefits for both students and teachers. Google Classroom enhances the productivity and take workflow management to the next level. It keeps track of assignments coming in with a simple glance making it very easy to know everyone's status and to follow up with students who are missing work. Everything is time stamped, so late work is easily identifiable. Since Google apps are cloud based the work in Google Classroom saves automatically and is accessible from any device. With the app, both students and teachers can enjoy the full functionality of Google Classroom on a mobile device. Students receive notifications on their phone when assignments and announcements are posted, making it easy for students to stay on top of classroom happenings. As a teacher, the app enables you to post from your phone either right from the app or using share-sheet support.

2. Padlet Page: Padlet is a digital education communication platform that makes interacting fun and engaging for classes. Padlet is a digital communications platform that helps makes interactions between student and teacher far more engaging and fun.

From words and images to videos and links, this digital space can be filled and accessed easily from multiple devices, making it superior to its real-world notice board equivalent.

2. Google Forms: Google Forms allows to conduct MCQ quizzes online. The information is stored as a spreadsheet automatically record the answers. The spreadsheet then populates the responses from the quiz or real-time. Google forms can be used to give feedback and receive feedback from students.

3. **Videoconferencing Platforms:** During COVID pandemic when the world shifted to Online mode for teaching learning various free videoconferencing platforms like Google meet, Zoom and Cisco webex were used to conduct online classes.

All these have varying needs and features. Zoom allows the facility of using its features using a browser also without the need to download the application, the app download is mandatory in case of the other two software. Zoom allows face touch up facility as well which is not present in the other two competing software. Google Meet allows the maximum on-screen chatting time with respect to the others. It has over 60 minute long conferences whereas the time cap of others is only 40 minutes. Zoom has the highest, that is, 49 people that can be viewed on the screen at once.

4. **Educational Videos and animations (Youtube and Internet):** Various valuable educational videos of pharmacy subjects available on internet, youtube provide additional help in better understanding of subject knowledge.

5. **Smart Classroom:** Classroom integrated with Smartboards and internet connections provides enhanced and interactive learning and teaching opportunities for students and teachers. The internet-connected to systems in smart classes is stored with abundant information. It is accessible anytime for their teaching and learning process. Teachers can access information from various educational sources for teaching purposes. It helps in easy access to online resources. Smart Classrooms helps in developing critical thinking and problem-solving skills in students.

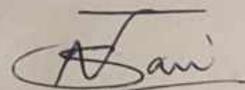

6. **e-Resources:** e- journals from Proquest Pharma and DELNET were available for students to access remotely in online mode and enhance their learning experience. e books were uploaded on Google Classroom.

7. **LCD Projectors:** The days with the use of blackboards filled with diagrams, equations, notes are gone away. The LCD Projectors have become a vital essence in the modern teaching system. They act as a visual aid to the students and teachers. They help the students to learn accurate structure through images. They also support the teachers' explanations with visual accuracy. This tool is used to display video lectures, to present the slides, to conduct quiz, webinars, or any other demonstrations.

### Outcome

The use of LCD projectors in smart classrooms reflects many outcomes which are listed below.

- The students are able to gain a better experience through new way of learning by retaining their concentration during the whole class.
- Visualization of the contents enhanced the objective of the curriculum.
- The students are able to repeat the text content more precisely.
- Effective usage of class timings.
